## About Me

I am 24 year old UI/Backend Engineer from kerala, currently living in Hyderabad, India. I have a passion for creating beautiful, intuitive, and highly crafted solutions combining a considered approach with emerging technologies. I like going through new stuffs which includes tech and tv series during my freetime.

## Work Experience

### Monocept

Senior Software Engineer , March 2018 - Present

Responsible for making microservices and monolithic applications using node.js frameworks like loopbackjs, sailsjs and templating engines like Ejs.

Works also include converting awesome designs into efficient and high performing web applications with easily manageable code and effortless integration using technologies like Angular JS, Angular, React, jQuery, HTML 5, SASS and build tools like gulp.

### F1 Studioz

UI Engineer, July 2016 - Present

Responsible for converting awesome designs into efficient and high performing web applications with easily manageable code and effortless integration.

Works include client side development of rich javascript applications by leveraging power of technologies like Angular JS, Angular, React, jQuery, HTML 5, SASS and build tools like gulp.

Worked closely with designers and backend developers to deliver pixel perfect and efficient web apps and sites.
